MECHANICAL CONNECTORS

'USMF-C' Copper In-Line Splices

Principle Application:

Straight jointing of circular stranded aluminium or copper conductors for all cable voltages up to and including 46KV.

Range:

The 'USMF' range of mechanical connectors incorporate an integral moisture/contaminant block and utilise the patented universal range taking shear bolts.

(USA Patent No's 6209424 & 6321624)

The appropriate socket is to be used at all times, typical samples shown below.

Material: Copper (Electro-Tinned)

Test Specification: ANSI C119.4 Class 2 Partial Tension

Test Report No: TBA

Fitting instructions:

1. Strip insulation from each core equal to the depth of the bore.
2. Wire brush the exposed conductor cores and wipe clean (optional).
3. Align and position the conductor cores in each of the bores ensuring that the core is fully inserted to the centre wall.
4. Fit the universal shear screws within the connector and torque tighten one turn at a time, using the correct socket, until the bolts have sheared.

***IMPORTANT:** When using the USMF1-C and USMF5-C the centralising ring must be used on cable sizes #2 to 2/0 AWG, inclusive.
